

My Musings on COVID19!

Covid! Covid! Covid!
Crying times and praying crowds!
Crumpling lives and broken dreams!
Countries confused and self-contained!

Perils, pains, and pathos all around,
Pandemic prevails with all its pangs,
Precautions, preventions and predictions all around,
Prescriptive medicine far beyond its invent.

Humans knit by net-workings,
Hunted by the strange virus 'airborne,'
Have been "distanced," – physically, mentally and spiritually,
Hurdled more by "closed downs," "lock downs," and "Quarantines."

Stilled schools, colleges, church and shops,
Stagnated jobs, movements, economy and employments,
Strange stories and narrations of channels and media,
Starving patients and nations – all so real.

Fast moving, fast pacing face of humans,
Faced this furious and ferocious virus,
Far beyond, it fainted the World all along,
Fear still surfacing on all those are alive.

Death, disease, depression and desperation,
Dear ones distanced and dissipated,
Danger is all over unbridled,
Dead end ever seen near at sight.

Nurses and doctors nursing with their life on the line,
Night and day scientists try for solution at sight,
Nations struggle to care, console, and contain their clients,
Never know when this dread comes to an end.

Let's all "stay home" and pray hard!
Let's all help, care and be generous and grateful!
Lord of heaven and Earth has an answer and cure,
Leave it all for Him to restore and resolve!
