Project Details

1. Title : SEARCH ENGINE OPTIMIZATION(SEO)

Tools : PHP, Dream viewer, Xamp - Apache Server

Description

- My research work focuses on building a well structured website (Heartawareness.info) with good content to attract and retain visitors with the Keyword Optimization, Link Optimization and Image Optimization.
- Successful Keyword Strategies are keyword selection, Link Building is a technique for placing website on various areas like web directories, social book marking, Blog, one way sub link, reciprocal sub link, on the internet to achieve a high page rank.
- Image Optimization avoids duplicate content on a Web site, unnecessary indexing of images (thumb nail, medium size, full size). In our website we can insert heart problem, smoking and alcohol effects related images. And alt tag keywords used in corresponding images.
- Web Analytic's approach is to show high level dashboard - type data, bench marking, technical profile, Map Overlay, Site Usage, City Detail, Service Provider, Connection Speed, Traffic Sources, Content Performance for the casual user and more in-depth data further into the report set.
- There are the fundamental to high quality of SEO (Google Yahoo and Bing) to improve the high page ranking for our website.
- Proposed website has attracted popular Search Engine such as Google, Yahoo, and Bing and the website has been indexed in a short Span of time(with in 7-8 days)
- Normally Search Engines takes 2 months time. Quick indexing don for Websites which follow SEO Techniques.
